Teetham Treelayapewat

teetham.contact@gmail.com | teetham.com | linkedin.com/in/teetham

Second-year Computer Science and Design undergraduate at SUTD on an ASEAN Undergraduate Scholarship, with four AI internships. International experience includes a school exchange in the Netherlands and the DGIT programme at Zhejiang University.

Education

Singapore University of Technology and Design — Sep. 2025 – 2029 (expected)
B.Eng. in Computer Science and Design, ASEAN Undergraduate Scholarship — Singapore

Kamnoetvidya Science Academy — May 2022 – Mar. 2025
High School Diploma, full scholarship — Thailand

International Experience

- **DGIT, Zhejiang University, China (Sep.–Dec. 2026):** scholarship-supported study programme and startup internship.
- **School exchange, the Netherlands:** selected for an 11-day exchange at Odulphuslyceum, Tilburg, while attending high school in Thailand. Lived with a Dutch host family, attended classes and joined daily life through cycling to school and cooking Dutch food.
- **#WeGotThis Youth Dialogue 2024, Singapore:** Thailand Representative in a dialogue on environmental innovation in ASEAN.
- **International Science Youth Forum 2025, Singapore:** attended lectures, joined STEM group activities and toured Singapore as a high-school student from Thailand.

Internships

Microchain Token — Oct. 2026 – Present
AI Engineer (DGIT Intern) — Hangzhou, China

- Developed Manifold, an AI-assisted pipeline that turns product photos and manuals into component-level 3D models and interactive guides, with separate generation, review and repair stages.
- Deployed an Alibaba Cloud pilot with an authenticated gateway, on-demand compute and private artifact storage. Verified end-to-end generation and browser preview.
- Built reusable Blender modeling tools for named parts, animations and geometry checks with 28 unit tests. Self-hosted and evaluated image-to-3D models on an RTX 4090.

AltoTech — Aug. 2026 – Oct. 2026
AI Engineer Intern (Onsite, then Remote) — Thailand

- Fine-tuned a 30B NVIDIA Nemotron model with LoRA for a 13-tool assistant on two DGX Sparks. Built a 792-example English/Thai training set and expanded evaluation from 179 to 289 cases.
- Improved hybrid RAG over 41 manuals, raising top-1 hit rate from 55% to 64% on 22 site questions. Enabled 32k-token training on one 80 GB GPU with chunked cross-entropy loss.

BOTNOI Group — Jun. 2026 – Aug. 2026
AI Researcher & Development Intern (Remote) — Thailand

- Built store open/close detection for a retail CCTV system using YOLO, OCR and luminance analysis. Designed an evidence-review interface and Docker Compose testing across three repositories.
- Reviewed five datasets and seven papers on floor-plan understanding. Built door/window detection and room-segmentation baselines on 400 floor plans.

Meticuly — Jun. 2025 – May 2026
AI Development Engineer Intern (Extended to Remote Role) — Thailand

- Developed a CT classification pipeline for CraNeXt. Achieved 99.4% body-region accuracy with BiomedCLIP and 96.1% craniectomy accuracy with a fine-tuned EVA-02 model.
- Achieved 1.12 mm error in cephalometric X-ray landmark detection with Thammasat University dentists, using multi-GPU training on the LANTA Supercomputer.

Research, Awards & Leadership

- **Regeneron ISEF 2025:** Thailand Representative and Finalist. Co-developed a C++/Geant4 particle simulation with a teammate.
- **ASEAN Data Science Explorers 2024:** National Top 10 Finalist, SAP & ASEAN Foundation.
- **SOAR Challenge 2025:** Best Automation Award, SUTD.
- **Vice-President, Eco-Schools Project (2024):** led the team to the International Green Flag Award. President, KVIS Science Inspiration Project (2023): led a five-day STEM workshop across 10 schools.

Technical Skills

Programming: Python, C++, Java, C, JavaScript, Bash, SQL
AI/ML: PyTorch, Transformers, LoRA, vLLM, Ollama, RAG, YOLO, OpenCV, LLM agents, image-to-3D models
Systems: Linux, Git, Docker, Alibaba Cloud ECS/OSS, Blender Python
